## How to load the Trading Robot

you have accessed the spike snatcher\_Royalty ex5. Copy it to your clipboard.

1. Open your weltrade mt5
2. Navitage to “file” on the top left corner, click on it
3. Next click “open data folder”
4. Open the “MQL5” file
5. Inside of it open the “EXPERTS” file and paste the  
“spike snatcher EA” ex5 file inside of it.
6. Now close your mt5 and reopen it again.
7. At the top menu next to file click on “VIEW”
8. Go to navigator
9. On the menu that appears, navigate to “Expert  
Advisors”
10. You will see “Spike snatcher\_Royalty 1.0”
11. Drag and paste the robot on all the spike  
indices (all painX indices and all GainX indices)  
and make sure the chart is on 15 minute time  
frame. Below are the best input settings you can  
always adjust to your liking.

12. To ensure the robot/EA is activated at the top menu look for “algo trading “ and click the red square, it will turn to a green rectangle, this shows the EA/robot is activated and waiting for the perfect time to take its 1<sup>st</sup> trade.

Now go back to your downloaded file and copy the tpl file (yellow clean file ), open mt5>open file>open data

folder >mql5>profiles>templates AND paste the “yellow clean.tpl “ file in here , and load it to all your indices.

You load it to all your indices by going to charts on the top menu of mt5, then click on templates, you select “yellow clean “

Your ea should be looking like this
