what is trading

- Trading is the act of buying something at a certain price and later selling it with a different price, hoping to make profit.
- In forex trading we buy and sell what we call financial assets namely :
 - forex pairs (e.g eur/usd)
 - Indices (e.g nasdaq and synthetic indices)
 - cryptocurrencies
 - commodities (e.g oil, gold)
- The prices of these financial assets are constantly fluctuating (i.e in the morning the price of eur/usd is low but in three hours time it is high), therefore the price changes are visually represented using what is called a **forex chart**.
- you can view the forex chart of a financial asset on an application called metatrader 5.
- you will need metatrader login details to be able to view the forex chart as well as to buy and sell financial markets on the app
- For you to get the metatrader login details you will need to create what we call a trading account.

How to get a trading account

- You can only get a trading account through a broker institution.
- A broker acts as the middle man between you and the financial market. One cannot trade without creating a trading account with a broker.
- There are thousands of broker institutions available and below is a list of top trusted brokers across the globe.

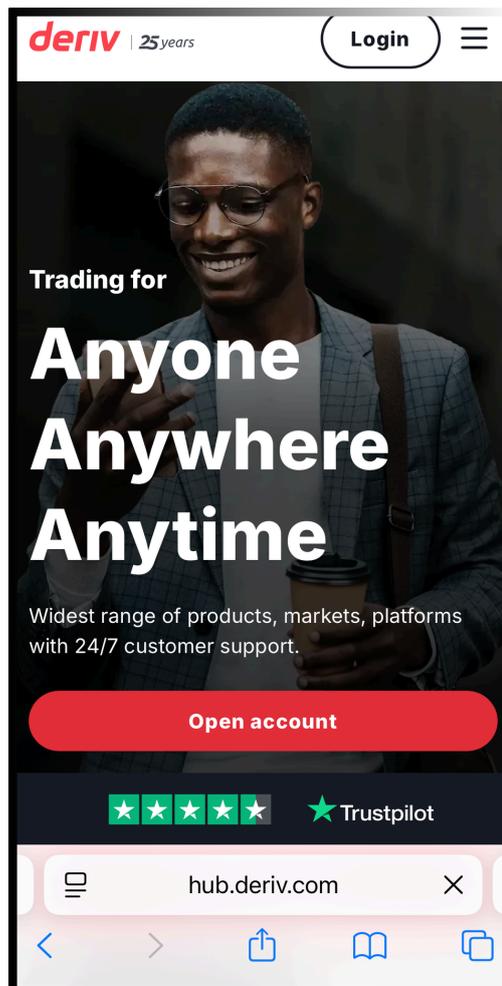

Broker institution	Best for trading
1. Deriv.com	synthetic indices
2. Weltrade.com	synthetic indices as well
3. Justmarkets.com	forex technicals , most suitable for day traders
4. Expro.com	forex fundamentals.

suitable for customers who accept the possibility of losing all the money they invest and who understand and have experience of the risk involved in the purchase of financial contracts. Transactions in financial contracts carry a high degree of risk. If the contracts you purchased expire as worthless, you will lose all your investment, which includes the contract premium.

FATCA declaration

I declare and confirm that I am not a citizen or resident of the US for tax purposes.

Real accounts are not available to politically exposed persons (PEPs)

A politically exposed person (PEP) is someone appointed with a prominent public position. Close associates and family members of a PEP are also considered to be PEPs.

I am not a PEP and have never been a PEP.

I agree to the **terms and conditions**.

what is Metatrader 5

Metatrader 5 is an app used by traders to buy and sell on the financial market. It is downloadable on the mobile app stores (Google app store and apple play store) and web browsers on computers

Do not get it mixed up with a broker, a broker just helps you with getting details for logging into mt5. you then use the account details you created on the broker website to login to metatrader 5

Every master was once a beginner

linking your broker accounts to MT5

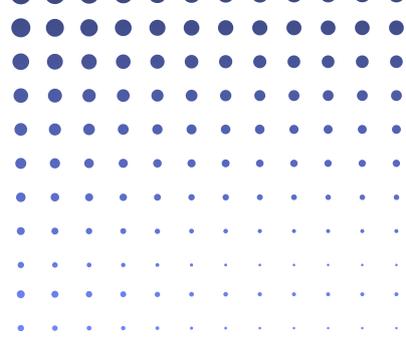

Android

1. Go to google play store.
2. Search for Metatrader 5 and download it.
3. Open the app on your phone, at the top left corner, click the 3 bar menu and click manage accounts.
4. Look for the “+ ” sign and click it.
5. It will take you to a brokers search bar.
6. Search the broker you have created mt5 logins with earlier on . e.g Deriv.com, weltrade, fxpro or justmarkets.
7. Continue to enter the login details as provided on the email. Enter the correct broker name, server name, login number and passwords.

THEN HOORAY you have finalised the process of creating trading accounts, and have your metatrader ready to buy and sell. You are now heading onto the next step of understanding how to know which financial asset to buy/sell, and when to actually sell/buy them on the financial market.
